

## Resource Stewardship

TVA's Resource Stewardship creates sustainable watersheds by protecting and improving natural resources for beneficial uses. We optimize multiple benefits to stakeholders and the environment by providing low cost and reliable power, supporting a thriving river system, and stimulating economic growth. A network of 11 watershed-based teams (listed on the back) emphasizes the following program initiatives:

### **Watershed Assessment and Planning**

- Develop and implement stewardship plans, sustaining beneficial uses of the reservoir and watershed consistent with community needs.
- Manage identification, protection, and enhancement of wildlife, threatened and endangered species, wetlands, and forest resources on TVA-managed land.
- Assess and protect cultural, archaeological, and historical resources.
- Monitor watershed conditions and measure the performance of improvement projects.

### **Protection and Improvement Initiatives**

- Work with coalitions and communities on protection and improvement projects throughout the watershed.
- Manage natural resources by maintaining and improving stewardship practices that integrate stakeholder interests, land and water quality, biological health and diversity and, recreation opportunities using best management practices and establishing riparian corridors to protect water and connect landscape features.

### **Asset and Regional Growth Management**

- Permit public infrastructure, commercial waterfront / water use facilities, and other uses for delivery of a multitude of public benefits.
- Provide guidelines for shoreline development and shoreline management plans.
- Operate and maintain dam reservations and TVA-managed recreation sites.
- Work with communities on aquatic plant and mosquito management programs.
- Act to improve cost recovery, provide efficient services, and deliver customer satisfaction.

## **TVA's Watershed Teams**
